Programming 5

Domain user scenarios

KdG Karel de Grote
Hogeschool

Scenario 1

Book — 1 — * — BookAuthor — * — 1 — Author

Book administrates ▲ * 1 User

A User class is added.

Scenario 1

Station — 1 — * StationStop — * — 1 — Train

Station *
administrates ▲
1
User

A User class is added.

Scenario 2

```
┌──────────────────┐ 1      *  ┌──────────────────────┐ *     1  ┌──────────────────┐
│    Developer     │───────────│   IssueAssignment    │──────────│      Issue       │
└──────────────────┘           └──────────────────────┘          └──────────────────┘
```
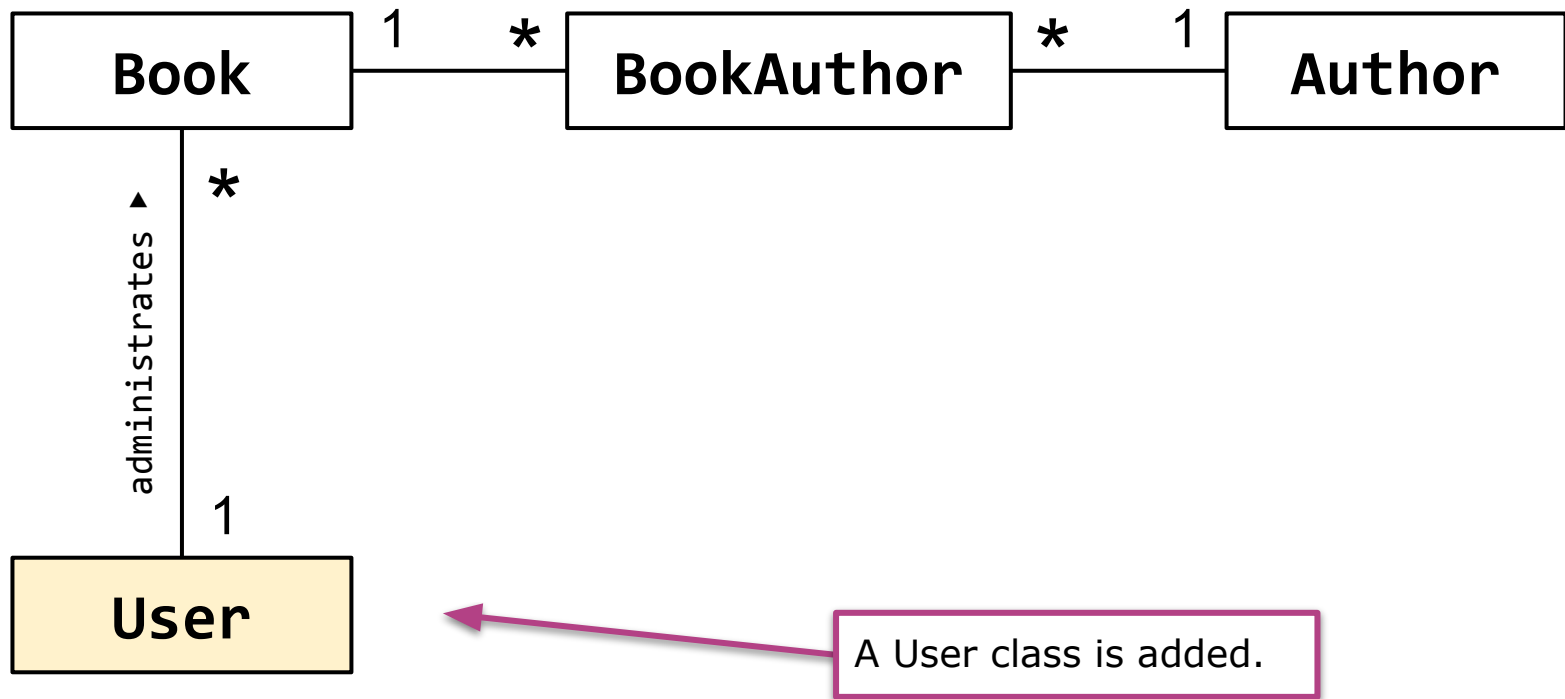

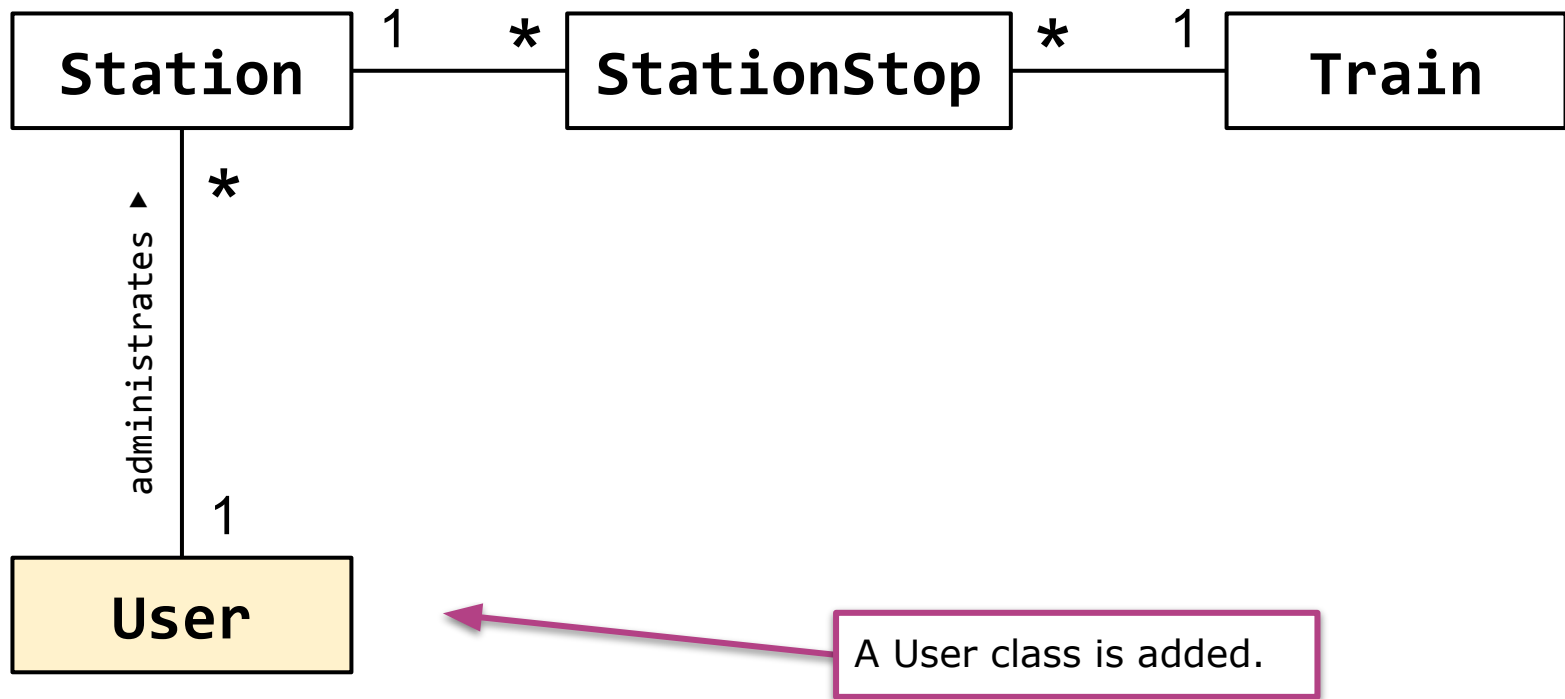

One of the domain classes already matches the concept of 'user'.
